PROJECTS

Critter

Critter is a Twitter-based clone, where creatures of all kinds come to interact with one-another. Critters can post their thoughts, follow other critters, and much more!

moesbnb

The functionality and essence similarly mimics airbnb. With moesbnb, users are able to create Spots and host their homes, apartments, etc.

PokéCupid

A principal clone of okcupid. With PokéCupid, users are able to create an account and connect to other users for multitudes of purposes, some including finding a significant other, 'training partners', or simply friends!
